

Kid Sit

Don't want to buy a second stroller? The Kid Sit allows you to easily and safely transport your second child around town on your existing stroller.

The device is lightweight and easy to carry around. At the same time it's sturdy and clips securely onto your stroller in less than thirty seconds, and without the need to use tools. Then...your child is able to simply climb on for a comfortable ride that they'll enjoy!

Your child has the option to sit down or stand up, and a strap is provided for your child to hold onto for extra security (they can also hold onto the bars of the stroller).

The Kid Sit is compatible with just about any stroller or pram with a horizontal rear axle, and can hold toddlers up to 18kg.

If you think you may be interested in transporting your child around without having to buy a second stroller, you can take a look at the Kid Sit above in our catalog now.
